PROFILE

Frontend engineer and technical lead with 10+ years building enterprise web applications across React, JavaScript, AEM and full-stack systems. Hands-on in frontend modernization, component architecture, developer tooling and cloud integrations. At Scania, delivered solutions associated with €150,000 in annual cost savings and an AI-enabled workflow that reduced Jira ticket processing time by ~50%.

TECHNICAL EXPERTISE

Frontend: JavaScript, React, Redux, TypeScript, Next.js, Vue, Angular, HTML, CSS/SCSS | Architecture: Design systems, component libraries, accessibility (WCAG), SEO, performance, frontend modernization | AEM: Sling Models, OSGi, JCR, Content/Experience Fragments, workflows, Dispatcher | Backend & cloud: Node.js, Express, Java, Spring Boot, GraphQL, REST, MongoDB, AWS, Firebase | Delivery: GitLab CI/CD, Docker, Jest, Cypress, Selenium, Protractor, Cucumber

PROFESSIONAL EXPERIENCE

Frontend Lead | **Scania CV AB** | 2022–Present

- Owned frontend architecture decisions for enterprise applications, including legacy modernization, component design, state-management/API patterns, performance, and engineering standards; mentored three developers and reviewed technical designs and code.
- Designed and deployed a custom AEM forms solution to replace licensed Adobe Forms, avoiding €90,000 in annual licensing costs.
- Architected migration of a CMS from AEM to a custom React, Spring Boot, MongoDB and AWS web application, saving €60,000 annually.
- Built an AI-enabled Jira ticket resolution application that applies fixes and executes unit, integration and live tests, cutting ticket workflow time by approximately 50%.
- Built AEM authoring and automation capabilities using Sling Models, Sling Jobs, workflows, event handlers and schedulers; automated Content Fragment creation with AWS Lambda.
- Improved CMS developer and author experience through SOLR search integration, a component-usage query tool, and accessibility/SEO checks using axe.

Founder (Part-time) | **Independent SaaS Startup** | 2024–Present

- Part-time founder: designed customer-facing SaaS interfaces with Vue and Spring Boot, and a restaurant-owner administration application with Angular and Spring Boot.
- Built dashboards and integrations using GraphQL, Firebase and AWS Lambda.

Software Engineer II | **Intuit** | 2021–2022

- Developed React/Redux UI components for integrated commerce workflows in partnership with UX designers.
- Led a proof of concept related to legacy data-table migration in a microservices environment.

Senior Software Engineer | **Hexaware** | 2019–2021

- Built React/Vue applications and REST APIs using Spring Boot and Express.js; developed an internal hiring application and Python/Selenium automation.
- Developed a custom video-player component to replace Dynamic Media and customized AEM Digital Asset Management (DAM) interfaces.

Associate Technology | **Publicis Sapient** | 2015–2019

- Built AEM-powered cruise-booking experiences, custom AEM components and content migrations; developed React/Redux interfaces using Pub/Sub patterns.
- Automated end-to-end UI testing with Protractor and Cucumber.

SELECTED ENGINEERING PROJECTS

Custom AEM Forms Platform | Scania — Architected and delivered a production forms solution replacing licensed Adobe Forms functionality. Integrated with the AEM authoring environment and eliminated approximately €90,000 in annual licensing costs.

CMS Modernization & Migration | Scania — Architected the migration of a CMS project out of AEM into a standalone web application using React, Spring Boot, MongoDB and AWS. Reduced annual platform costs by approximately €60,000.

AI-Assisted Jira Ticket Resolution | Scania — Built an AI-enabled application that applies fixes to Jira tickets and validates changes through unit, integration and live tests. Reduced the ticket workflow time by approximately 50%.

Live Production Website Debugger | Internal Developer Tool — Built an Express.js service and Chrome extension that intercept selected production JavaScript libraries and map them to local source files. Enabled engineers to debug live website behavior against local code without waiting for a production deployment.

No-Code Website Testing Tool | Internal Developer Tool — Created a desktop testing tool with React, Electron and TypeScript to help users test websites and applications through a no-code interface.

Company-Specific AI Search | Professional Project — Developed and deployed an AI-powered search experience using Ollama and Llama 3, with retrieval-augmented generation to search company website and application information rather than the public internet.

CMS Authoring & Content Automation | Scania — Developed custom AEM authoring interfaces and automation with Sling Models, Sling Jobs, workflows, event handlers and schedulers. Used AWS Lambda to automate Content Fragment creation and built a query tool for component-usage analysis.

Search, SEO & Accessibility Toolkit | Scania — Integrated SOLR-powered site search and developed internal SEO and accessibility checks using the axe library in the AEM authoring workflow, helping authors assess content before publication.

SaaS Product UI & Admin Platform | Part-Time Startup — Designed and built customer-facing interfaces using Vue and Spring Boot and a restaurant-owner administration application using Angular and Spring Boot. Delivered dashboards, responsive views and integrations using GraphQL, Firebase and AWS Lambda.

AEM Developer Experience Enhancements | Scania — Built a hot-reload workflow and Chrome extension for faster AEM UI development, alongside a React SPA setup and custom authoring components, including an image component with light/dark presentation based on image brightness.

Custom Video Player & AEM DAM | Hexaware — Developed a custom video-player component to replace Dynamic Media and customized AEM Digital Asset Management interfaces to meet client workflows.

Enterprise Booking & Content Migration | Publicis Sapient — Built AEM-based cruise booking experiences, custom components and React/Redux UI patterns using Pub/Sub; supported content migration and automated end-to-end testing with Protractor and Cucumber.

EDUCATION

Bachelor of Engineering | RV College of Engineering, Bengaluru | GPA: 8.1
